

FollowMyHealth Features Guide: **Viewing Your Health Information**

via Online on the Computer

FollowMyHealth®
An Allscripts Solution

Viewing Your Health Information via Online on the Computer

This guide will display the following types of health information you can view in your FollowMyHealth patient portal:

- 1) Health Summary
- 2) Conditions
- 3) Medications
- 4) Allergies
- 5) Immunizations
- 6) Lab Results
- 7) Vitals
- 8) Documents
- 9) Chart

(I) Health Summary

1. Click on the “My Health” tab at the top of the page.
This tab is where you’ll see all of your health information.

2. Click on the
“Summary” tab to view
a summary of your
health information.

The screenshot shows the Sea Mar Community Health Centers patient portal. At the top, there's a navigation bar with links like 'Send a Message', 'Schedule an Appointment', 'Hello', 'My Account', 'English', and a search icon. Below this is a secondary navigation bar with tabs: 'Home', 'Inbox (0)', 'My Health' (selected), and 'My Info'. Under 'My Health', there's a sub-navigation bar with tabs: 'Summary' (selected), 'Conditions', 'Medications', 'Allergies', 'Immunizations', 'Results', 'Vitals', 'Documents', and 'Chart'. The main content area is divided into sections: 'Demographics' (with a patient profile card), 'My Care Team' (with an 'Add Provider' button), 'Diagnoses' (listing various conditions), 'Surgical History' (listing medical procedures), and 'Allergies' (listing allergies). A 'Send' dropdown menu is open, showing options: 'Email', 'Email All', 'Print', 'Print All', 'Fax', and 'Export'.

Demographics

My Care Team + Add Provider
Click the 'Add' button to create and edit a list of your most frequently used healthcare professionals. This list will be saved to your FollowMyHealth Summary screen, which can then be printed and shared with your physicians.

Diagnoses

- Closed fracture of nasal bone, initial encounter
- Hypertension
- Diabetes (DM), Uncomplicated, Type II (250.00)
- Congestive heart failure
- Normal pregnancy, first
- Tobacco use
- Cancer Screening: Colon (V76.51)
- Pain in wrist, left
- Pregnancy, high-risk (V23.9)

Surgical History

- Adacel vaccine: Tdap vaccine >7 IM (90715) (90715)
- THROMBOEMBOLIC DETERRENT (TED) STOCKINGS CHECK (1180F)
- RT: SPIROMETRY, PRE+POST BRONCHODILATOR (94060)
- Immunization Admin 2+ (90472)
- PNEUMOCOCCAL VACC 13 VAL IM (90670)
- Administration of One Immunization (90471)
- Zostavax (Shingles Vaccine) 3C (90736)
- Tobacco Use Treatment Counseling (4000F)
- COLORECTAL CA SCREEN DOC REV (3017F)
- Administration of One Immunization (90471)
- Pneumococcal Vaccine (90732)
- Bees - Anaphylaxis
- No Known Drug Allergies

Note: This drop-down menu displays options on emailing, printing, faxing, or exporting your health summary.

(2) Conditions

1. Click on the “My Health” tab at the top of the page.

2. Click on the “Conditions” tab to view your active conditions, surgical history, and family health conditions.

The screenshot shows the Sea Mar Community Health Centers patient portal. The 'My Health' tab is selected at the top. Below it, the 'Conditions' tab is also selected. The 'Conditions' section displays a list of active conditions, including 'Closed fracture of nasal bone, initial encounter...', 'Tobacco use', 'Hypertension', 'Cancer Screening: Colon (V76.51)', 'Diabetes (DM), Uncomplicated, Type II (250.00)', 'Pain in wrist, left', 'Congestive heart failure', 'Pregnancy, high-risk (V23.9)', and 'Normal pregnancy, first'. Each condition has a 'Send' button with a dropdown menu for 'Email', 'Print', and 'Fax'. A red box highlights the 'Send' button for the 'Cancer Screening: Colon (V76.51)' condition, and a red arrow points to it from the third instruction box.

Closed fracture of nasal bone, initial encounter

Fractures

https://medlineplus.gov/fractures.html?utm_medium=service&utm_source=mplusconnect

Also called: Broken bone

A fracture is a break, usually in a bone. If the broken bone punctures the skin, it is called an open or compound fracture. Fractures commonly happen because of car accidents, falls, or sports injuries. Other causes are low bone density and osteoporosis, which cause weakening of the bones. Overuse can cause stress fractures, which are very small cracks in the bone.

Symptoms of a fracture are

- Intense pain
- Deformity - the limb looks out of place
- Swelling, bruising, or tenderness around the injury
- Numbness and tingling
- Problems moving a limb

You need to get medical care right away for any fracture. An x-ray can tell if your bone is broken. You may need to wear a cast or splint. Sometimes you need surgery to put in plates, pins or screws to keep the bone in place.

- [Broken bone](#) (Medical Encyclopedia)

(3) Medications

1. Click on the “My Health” tab at the top of the page.

2. Click on the “Medications” tab to view all your active and discontinued medications.

Note: If you would like to request a prescription refill, find the line with the medication you would like to refill. Click on the pill bottle icon in the “Options” column.

Note: If the pill bottle icon is grayed out, this indicates that you do not have any available refills for this prescription. Use the messaging feature to send a message to your provider.

Caffeine in Your Diet

What is caffeine?

Caffeine is a stimulant that occurs naturally in tea leaves, coffee beans, cocoa beans, and several other foods. While many people enjoy the stimulating effects of caffeine, too much caffeine can cause unpleasant side effects.

How does caffeine affect the body?

Caffeine affects many parts of the body:

- It stimulates the brain and makes you feel wide awake, energetic, and better able to concentrate.
- It makes your heart beat faster and improves circulation.
- It helps muscles to work better.
- It aids digestion by increasing the amount of acid made by the stomach.
